(6SF-R)

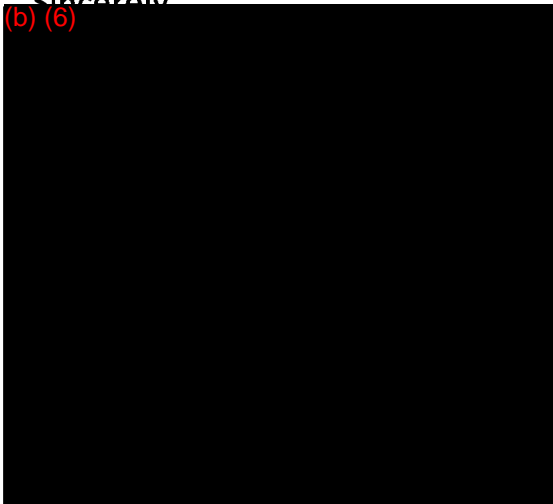

Dear Mr Miller:

It is becoming increasingly obvious that the EPA needs to find a permanent solution to the issue of the San Jacinto Waste Pits. As a resident of Galveston County, my family and I live in fear that if these hazardous materials become uncontained, our health and well-being will be compromised.

I'm sure you're paying very close attention to this serious problem, but it's absolutely crucial that you act fast. A permanent cap is the only way to ensure that toxic waste will not be brought up from the river and the toxicity levels will not increase. I believe that this option is the best choice for my family, so please consider it as you move forward with your process.

Sincerely,

(b) (6)
